Knowledge Exchange & Impact

Traditional Scholarly Impact Metrics

- Total number of publications
- Total cited times
- Average cited times per publication
- H-index

Our Scholarly Impact Tool Metrics

- Overall publication impact
- Publication depth & breadth
- Citation depth & breadth
- Geographical spread

We Use Our Tool to Support:

Grant Applications

Award
Nominations

Promotion/Tenure
Applications

Organizational
level Evaluations

Strategic Planning

How We Hope to Use Dimensions & Altmetric

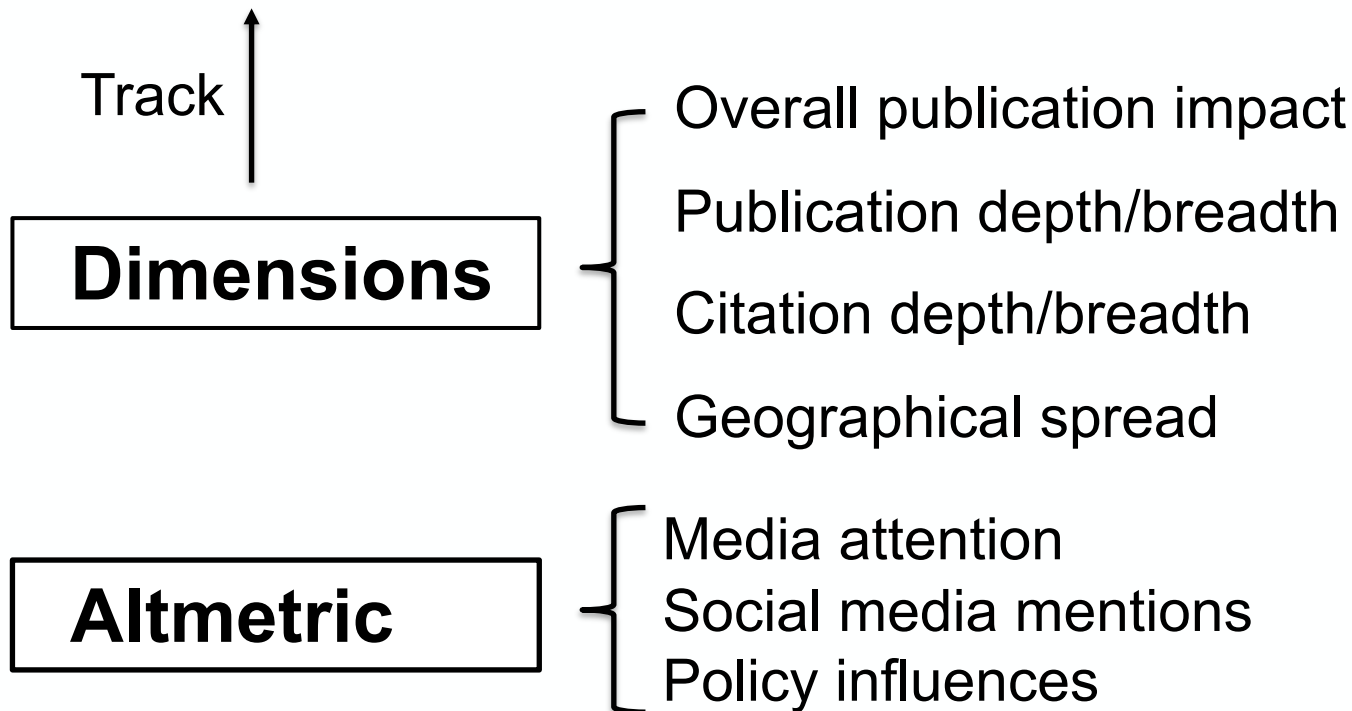

Research outputs in Scholarship@Western

Altmetric**

How We Hope to Use Dimensions & Altmetric

Research outputs in Scholarship@Western

Open Discussion

- Is your entire institution using Dimensions and/or Altmetric or only specific faculties/departments/disciplines?
- Speaking of the coverage of Dimensions and/or Altmetric database, what does cross faculty representation look like in your institution?
- What types of research output are not covered by Dimensions and/or Altmetric?
How have you addressed this?
- How do you use/compare Altmetric scores at an institutional level?
- Have you integrated Dimensions and/or Altmetric with existing systems/repositories?

Open Discussion

- Are broader outputs included beyond traditional scholarly outputs when your institution assesses scholarly impact?
- What metrics are your institution using?
To address what goals/areas (e.g., research)?
- Where did the push for assessing non-traditional research outputs start – central research office, libraries, senior leadership etc.?
